The only time a retail store really serves the in-terests of its customers is when it remains open for their convenience and the only people the merchants who say they are closing for the convenience of their customers are fooling, are themselves. In a democracy, that is their privilege but it ceases to become a democratic right when they try to force other merchants to conform to their way of thinking. Municipal councils should be wary of getting involved in regulating retail store hours when retailers themselves cannot agree on policy

ON SUCCESS IN SEELLING

ON SUCCESS IN SELLING
The question most often asked in the sales offices of
real estate firms across Gunda is, "how do I as a sales
man attain any real odgere of success in selling homes!"
A cross-section of replies would point out that it is a
matter of guidings conditiones in the minds of the buyers,
the sellers and the public generally.
Building confidence results in the buyer and the
sellers with the sellers of the sellers and the real control of the sellers of the sellers and the sellers of the sellers and the sellers of the sellers of

For you a salesman to build that confidence depen upon several things. . knowing your prospect. . hold-ing his interest. . paying attention to his conversation . . etc. To know your prospect, find out all you can about him: family, job, what he wants and what he can

about him: family, joo, what he wants and what he can afford. Unless you properly qualify a prospect, you'll end up making a sales talk "cafeteria style"; you spread out a wide veriety of listings before him and he wastes his time and patience trying to decide. When you know your prospect you know what he wants.

Hold your prospect's interest. Once you see his Hold your prospects interest. Once you see his sternion start to wander, fasten it on something eise. If he thinks the yard is too hig to care for, remind him of the fine neighbours he will have. Pay attention to your prospect. Don't let your attention wander. A chaince remark by a prospect ("Tim interested in woodworking") can be used to clinch a sale "Then you'd work his lows; the basement's perfect for a work

cessful real estate salesmen don't rush through a well-prepared sales talk. Give the prospect time to com-ment or hell think he's being high-pressured. Draw him out with a leading question, such as: "Do you prefer double-hung or casement windows?" This gets his objection out in the open where you can work on them. Successful real estate salesmen watch the time. If

you know your prospect has an appointment elsewhere and won't have much time, you're better off setting our another showing. Then hell be able to concentrate; you'll be able to sell; and your listing won't be hastily rejected. As the old saying goes, you may only delay the sale — not destroy it. —The Canadian Realor.

The opening of the newest retail outlet in Lindsay on Thursday will forget for Lindsay for Thursday will forget for Lindsay for the company now lays claim to being the largest Canadian owned variety store chain in Canada, operating stores in every province from consist to coast. In addition to retailing, the Stedman Organization also has a large wholesale operation which services over 80 ft.

Head Offices of the fir which includes the buying fices and warshouse faciliti are located at 138 Portla Street in Toronto. The wa house and buying offices cosist of a modern 125,000 in the buying offices of

ft. building.
To-day Stedman's employ
over 1,500 Canadian employees directly and several
thousand more indirectly considering that a large amount
of the products sold in the
Stedman Chain are produced
right in Canadia.

Commenting on the economics of the operation, a spokesman said. "Over 97% of the dividends paid to share-holders by the firm are paid to Canadians."

The new store in Lindsay,

The new store in lindsay, will, he declared, feature the most modern merchandise techniques, with fixturing designed to present the wide assortment of merchandise to the best advantage for easy customer selection. The new store will be a modern self service unit with clerk service available whenever, ze-ice available whenever, ze-

quired.

The manager of the Lindsay store will be Mr. Al Leonard, formerly of Carleton Place, Ont., who has been employed by Stedman Bros. for over 28 years.

Free gifts and draws

In addition to door-opening give-a ways as advertised along with free gifts to customers while they last, the Stedman store at Lindaus will feature draws throughout the opening for free gifts to the lucky winners. Interior View of the New Store

The picture above, showing only a small section of the expensive new Stedman 5t to \$1.00 Store at Lindsay gives only a slight idea of the variety of merchandise to be carried by the 135th unit of the comman's chain of retail outlets.

Things have changed in 17 years

and so has Esso oil heat

It's been 17 years since John last wore his uniform. It was around the same time that thousands of Canadians were able to install new, carefree oil heating equip-ment in their homes. Some of these faithful furnaces are now beginning to show signs of age. Time works both ways however, and many important improvements have been added to both heating equipment and fuel quality.

It costs very little to modernize your home heating plant. Maybe all you need is a new burner for your present furnace. Even a complete new oil heating unit costs much less than you might think. Everything you need is available on easy budget terms with the low interest Esso Heating Equipment Finance Plan.

If you are considering modernizing your equipment, investigate all the angles, Discuss your problems with us and let us help you to continue to enjoy the safety, convenience and economy of Esso oil heat with modern heating equipment.

A WELCOME ANNOUNCEMENT

Lots of things we hear nowadays hardly come under the heading of good news but the announcement by the Lindays industrial Commission that another industry is locating in town is a welcome one. It is the first significant stirring of new industrial life felt by the town in many months.

According to available information, the American

firm which is opening a branch at Lindsay to manufac-ture kitchen utensils, will absorb several people into its staff, although the operation will not at first be large a new company. We are informed by Mayor Joseph Holtom that it is a third generation American family venture known as the Turner-Seymour Manufacturing Company of Torrington, Conn., and that it has a high

Lindsey has much to offer moderate-sized industry and its environment has a lot to offer the personnel of industry. Like anything else, these qualities much sold and we hope the industrial commission meets with continuing success in doing so. TAKING THE LONG RANGE VIEW ON THE SEWAGE DISPOSAL PROBLEM

These are times when most municipalities are acutely conscious of the cost of maintaining themselves -- the provision and upkeep of essential services -- as the provision and upken of essential errices. - as reflected in ever-monating taze. This trend promps municipalities to regard with concern that which is going to place further tax burdes on the people. It is natural, therefore, when Lindsay is called upon to provide adequate sewage treatment facilities, that we strive to get the best for the least. At the muneral, Lindsay has a sewage treatment At the muneral, Lindsay has a sewage treatment before it is paid for. Compounding the problem is the fact that the zone, by order of the Outstro Water Resources Commission, is requested to at least put the present joint has their operation. The Post" early took the postion that we should not commit the town to unnecessary investment in this respect, especially since the present plant is not paired for and, if repaired, might serve the town's immediate needs. As a result, we sought to have further consideration given to a decision to append something like \$320,-000 for a lagoon-type treatment system which, up until then, had the Council's full endorsement. A meeting was subsequently arranged by Mayor Holtom with the was subsequently arranged by Mayor Holtons with the engineering irms, at which a counter proposal was sub-mitted by "The Fost" and discussed. A CLASS APART

Under the editorial head Second Class Citizens? In our January issue we protested the use of the term and insisted that the servants of Ontario are in every sense first class citizens. In this issue, we reprint a Toronto Star article which again effectively tags civil servants generally as second class citizens, second class in the generally as second class clittens, second class in the sense that the protected rights of clittens are denied cirl servants. It is not our purpose to take issue with missal of the rights of Dominion (tril Sevents. We do take issue with those who, while loudly proclaiming their championship of demorracy, endanger democracy by using their brief authority to decide in the public interest who shall not receive all its beautits of demo-cinerest who shall not receive all its beautits of demospite of our protestations, that any group of citizens who are prevented from realizing all citizens' rights must be regarded as something less than first class.

The question of denial of fair pay to some 50,000 or citizens. The real issue is whether absolute authors should be used to enforce unilateral decisions on mino ity groups who happen to come under the direct control of the absolute authority. Surely NOT in a democracy! Where does the real public interest He? It can be conceded that the Ontario Government

HUNTING The Ontario Safety League suggests you observe the Duck Hunter's Safety Code for safer and more enjoyable

shooting this fall: ose a Captain. Duck hunters should decide who

will be leader or captain of the shoot when hunting in pairs or larger numbers. This should be done before entering the blind of hide. The most experienced hunter should be chosen. If they are hunters of equal skill, position should be alternated from day to day.

Sit Close. Hunters in a blind or hide should sit close enough together when shooting in pairs so as to prevent either hunter from getting in front of the hunter's gun

Restrict your field. The field of fire for each hunter in a blind or nide should be agreed upon before shooting. The hunter's field of fire should not overlap his partners by more than a 45 degree angle measured from a centre line right-angled to the front or rear of the blind.

Rost guns safely. A gun should never be left in a ent of a boat or dog might position where the mover cause it to fall down and discharge.

Shoot your own birds. When hunting in pairs and a flight of ducks approaches from the right, the hunter on the right should take the rear of the flock and the hunter on the left should take the rear of When the flight, approaches from the left, this procedure should be averted.

Never face each other. Gun muzzles pointed away from other hunters at all times. GOT A MINUTE? WHAT FOR?

It's been 17 years since John last wore his uniform. It was around the same time It's been 17 years since joint has write unfollow, a refere oil heating equip-ment in their homes. Some of these faithful furnaces are now beginning to show signs of age. Time works both ways however, and many important improvements have been added to both heating equipment and fuel quality.

It costs very little to modernize your home heating plant. Maybe all you need is a new burner for your present furnace. Even a complete new oil heating unit costs much less than you might think. Everything you need is available on easy budget terms with the low interest Esso Heating Equipment Finance Plan.

If you are considering modernizing your equipment, investigate all the angles, Discuss your problems with us and let us help you to continue to enjoy the safety, convenience and economy of Esso oil heat with modern heating equipment.

WHICH CAME FIRST?

A few days ago, Lindsay's Board of Health received a letter from the administrator of the Ross Memorial Hospital complaining of conditions around the livestock barns during Lindsay Central Exhibition.

In the first least the conditions around the livestock barns during Lindsay Central Exhibition.

In the first instance, when considering this matter, It in the first instance, when considering this matter, It is unfair to give the exhibition a balick eye on this score innomuch as it was probably established before the host-pital and it would be just as logical, in one sense of the word, for the exhibition board to complain as it is the hospital. The exhibition board could charge the hospital built in too close proximity. Then, too, there is also the proposibility that extension of the hospital found up any possibility that extension of the hospital found up any draininge system which existed at the burns. However, this is not to argue that the present condition is either desirable or doesn't require remedying and is merely to point out that there is the matter of "which came first" to be considered and the exhibition shouldn't be made to look as though it had deliberately arranged its livestock barns so as to be offensive to the hospital

It has been known for some time that the exhibition board would like to see new livestock barns of the coli-soum type erected on another part of the grounds. We seum type erected on another part of the grounds. We believe this is essential as soon as the board can see it way clear. If or no other reason than to accomodate the forestangly large livestock exhibit. Trents had to be put up to shelter some this year! Facilities are now insele-quates and the promising of the barries to the hospital can quanta and the promising of the barries of the facility options are the promising the property of the property of place the exhibition in bad light when the profition in which it finds itself is more or less simply by a by-pro-duct of expansion.

PRACTICE WHAT YOU LEARN
October 7th to 13th, is Fire Prevention Week. This week is observed each year, in an attempt to educate our citizens in the ways of Fire Safety and thus cut down the annual toll in life and property.

That such education is necessary, is obvious from two facts: Fire in Canada in 1961, cost Canadians over \$127,000,000 in property loss and over 550 lives, of

silty,000,000 in property loss and over \$50 lives, of which over 200 over children.

Learn all you can about fire \$5 drey and put what you then the control of the property of

another fire fataity.

Now a word about matches—if only people wouldn't
be so careless about them. So often they toss a match
into a wastebasket. That's an invitation to big trouble.

And too often matches and lighters are left reach they.

And too often matches and lighters are left reach they'll intrique children; instead of being plened safely out of reach of those innoceat hands. Children playing with the children was reasonable to the children who are really responsible to be adult, not the children, who are really responsible to the children, who are really responsible to the children, who are really responsible for ball souskeepings, which mighty create first house the children was reasonable for the children was reasonable for the children was reasonable to the children was reason

And in the kitchen too, this bad housekeeping men-ace often shows up. Grease is permitted to accumulate on stores and pans, where it can burst into flames readily. Incidentally, its a good idea to keep a long-handled fork handy should a pan catch fire, in that case the blaze can

about a pan catch life, in that case the blaze can be quickly extinguished by lifting a lid with the fork and covering and smothering the flame.

Another great cause of fire — one in five in fact, according to the Canadian Underwriters' Association — is the misuse of electricity. Some people use too many extension cords from their outlets and easily overload the extension cores from their outlets and easily overload the circuit. They put in fuses that are larger than the line was designed for. They run extension cords under car-peting and hang them over, anils so the cords become frayed. Frayed wiring represents an open invitation to fire. If there is any doubt about the safety of the wiring in your home, call in a qualified electrician and have him

Even when the fire does break out, the toll in lives and property would often be reduced if people were familiar with the proper steps to take. Basically they are simple steps. First: get everybody out of the house! Then: call the fire department! Delay on either of these

The National Hockey League Ricks of it is son season tonight with a single contest at Chicago. The Black Hawks will host the Toronto Maple Leafs, defending Cup Champions. Toronto defeated Chicago, four games to two, in the cup finals last season. The other N-H-L teams will open play tomorrow, with Montreal at Boston and Detroit at New York. DEFENDS TITLE

World flyweight champlon Pone Kingpetch of Thai-land defends his title for the third time tonght in a scheduled 15-round bout in Tokyo. Kingpeht takes on fighting Harada of Japan, winner of 28 of 27 bouts. However, the champion is favored to beat the 19-year-old Harada because of his greater experience.

Mexico refused yesterday to permit heavyweight champion Sonny Liston to give a boxing exhibition in Mexico City. A spokesman for the Mexican Boxing Commission said exhibition bouts are not permitted under commission rules. He gave as another reason the senate REMAINS UNCHANGED

Our Objective is the Same As Yours:

We Carry:

BALANCED FEEDS

-A complete line of dairy, beef, hog and poultry feeds. Try the Co-op Profit Proven Program that suits your needs today.

CONCENTRATES AND SUPPLEMENTS

Co-op concentrates are designed to mix with your own homegrown grains in order to achieve efficient production.

MILLFEEDS AND PROTEIN SUPPLEMENTS

GRAINS AND CHOPS

---We keep only the finest quality grains and chops. We also carry an economical line of lower price mixtures.

MOLLASSES

—Bulk molasses is always on hand. Molasses can be blended in your feed to your exact requirements. We also have molasses in barrells for for your convenience.

Have you got your share in patronage dividends from your Co-op the past three years? If not, why not start earning those valuable dividends today by buying from your Co-op. Remember local farmers have paid for many feed mills but this one they own.

Your Co-op Staff in Lindsay Are Ready and Able to assist you with your feeding programs in order to achieve the above objectives. We have a feed program for every need.

Remember

"Co-Op Feeds make their way by the way they're made"

CALL US FOR FAST ACTION We provide:

AN OLD TRUTH

by C. J. Harris.

The under-educated or under-trained are today's unemployed in Canada — and will be tomorrow's. It seems to be generally acknowledged that this is the core of the unemployment problem, and it seems to be generally accepted that its solution is to provide more or different education for youngsters coming up into the labor force plus retraining programs for jobinto the labor force plus retraining programs for joi-less adults. However, conceding that such reforms are assential and possible, it must be asked if there is respect for the old-fashlood strice of self-relations and industrionness. In short, have we lacked opportunity for learning, or willingness to work at it? A re-cent talk by Dr. W. R. A COLD. WET JOB
Observers of the Saturday Lindsay Farm Market in
operation during the summer months are waves of the
fact that it is sought out by many people who like to lot
tain some of their supplies direct from the producer.
Latt Saturday morning, despite the aimost continuous
rain, some producers and some partons were on hand
but it was 20 da, with job for both applies and consumer.

We sometimes feel that not enough attention has we sometimes rest that not enough attention has been paid to the farm market... that it has not been en-couraged to the extent that it might be and as similar markets are in other centres. Many places go out of their way to develop a farm market and in some in-stances, they have become big attractions in a town or

Lindsay being located in the heart of a farming area, should be interested in seeing that a market place is an established and continuing arrangement.

A REMINDER .

A REMINDER...

Reports and Remarks...

Another part of the problem, one that will be more storius in the near future, is the resistance to change on the part of employed adults. Research has shown, said Dr. Dymond, that the average worker can no longer ex-Dr. tymona, that the average worker can no longer ex-pect to remain continually for any extended period in a single occupation with a given set of unchanging skills. However, even though it is obvious that the upgrading of labor requirements leads to wider opportunities and higher jeay. It has proved almost impossible to permade employed workers to learn the skills needed for better and more permanent jobs.

It seems to be the case that no matter what changes must be made for these new times in school

THE POISONS IN YOUR HOME

"Prevent Accidental Poisoning" is the theme of this year's National Pharmacy Week (October 7 - 13) pro-

A child who will not drift me min; we re-versibly several ounces of knorose or floor cleaner. The child who won't each his carrots will consume sev-eral dozen headnethe tables, aleeping pills or tranquil-zers without water. Virtually all accidental poisonings could have been prevented. The rules to follow are not complicated.

Store household agents such as tye, cleaning and polishing preparations, kerosene, paints etc. high in cabinets or in a locked cupboard.
 Store all medicines in locked cabinets.
 Always return products to their storage place.

90% of all oil company product research in Canada

is done by Imperial

At Sarnia, Ontario, and Calgary, Alberta, Imperial operates the largest petroleum research laboratories in Canada. At Sarnia, the company's scientists and technicians are working to improve present products and to develop new ones. Their research covers

many fields, from gasolines to household detergents. At Calgary, imperial research personnel are exploring means to find and produce more Canadian crude oil and natural gas. Imperial does more research than all other oil companies in Canada combined.

Radio and Radar

A distinguished Scottish physicist, James Clarke Max-well, was the first to show, in 1868, the existence of radio waves, radiating in the ether, upwards and outwards in all directions. Britain's Post Office engineers were already experi

menting in signalling with these waves when the Italian inventor Marconi arrived in England and, under the aegis of Sir William Preces, the Engineer-in-Chief, began the long series of experiments which resulted in 1901, in es-tablishing radio communications across the Atlantic. Radio consumpration of the three communications across the Atlantic. Radio communications was transferred when Siz Edward Applicton in 1925, discovered what is called the "F-Layer", a region of ionised gases high above the earth's surface which by reflecting radio waves permits a sound to be sent around the world.

The Scottish scientist Sir Robert Watson-Watt (shown

here), used the fact that radio waves could be reflected to pioneer radar in time for its use in the defence of Britain against air attack in the second World War. A na tain against air attack in the second World War. A narrow beam of radio waves reflected by an aircraft to a receiver on the ground enabled the invisible plane's position to be plin-pointed. It takes a furnace to light Esso furnace oil

There is no safer heating fuel than Esso Furnace Oil. It will not ignite or burn until atomized and safely inside your furnace. Outside the furnace, the oil will actually put out the match. Not a very exciting test, but very convincing and remarkable if you realize that the same oil is the most efficient and economical heating fuel available.

Oil is Canada's most popular heating fuel. Over 54% of all Canadian homes are heated with oil, and oil heat outnumbers all other automatic heating systems four to one! No other heating system gives you such complete, carefree comfort as safe, dependable Esso oil heat.

Whatever you need, whatever you want to know about home heating, just call your local Imperial Esso Agent or Distributor for free advice. Let him help you solve your home heating problems.

"THE GATA STRIP"
Real estate agent George Dent has dubbed the proposed five-foot reserved strip of land along the river front where it passes through town "The Gasa Strip" and it promises to be almost as troublesome. The beautification of the riverbanks through the form is a commendable ambition and the Lindsey Parks Board has made a nobable contribution towards this end. Board has made a notable contribution towards this end. However, this singerings project and should be visced in this light. It is therefore essential that whatever earlies in stands as many of the stands of the this respect could result in unnecessary complications

SHORT TERM PARKING

SHORT TERM PARKING
Those "yed hashed" parking meters came in for some attention by Lindsays Zouncil this week with the result that the penalty for a violation has been reduced from one dollar to 50 cents. This is a fair more and pitters the cost of which the other.

Councillor M. DeGreat protested the presence of these short term meters (three minutes for a cent of 15 minutes for a minute for a cent of 15 minutes for a minute for a cent of 15 minutes for a minute of 15 minutes of 15 every time the need crops up and at worst after a rela-tively short delay. Of course, there is the matter of the higher parking time rate but, preferred accomoda-tion usually commands a premium rate.

SOUNDS MORE PRACTICAL

SOUNDS MORE PRACTICAL
Mayor Joseph Holtom's suggestion, advanced at this
week's Lindsay Planning Board meeting sounds as though
it would be more practical to apply than the earlier fivefoot riverbank allowance previously advocated. Surprisingly enough, there is a vast expanse of the river's banks which has not been developed. According to data sup-plied by his worship, there exists 33,000 feet of riverbank within the town's limits, only 7,200 feet of which have

parties and working, more cases across once in the base periodic parties and the properties of the pr

product more satisfying than a narrow band of property bordering the riverbanks.

WOULD YOU KNOW WHAT TO DO?

Now, with the colder weather about to descend on this region, the threat of fire in the home becomes great-er. Each year, when fire strikes in homes across Can-ada, many people lose their lives when they do the wrong thing, especially when they are awakened in the night by the smell of smoke. Would you know what to do if this happened to you?

THE DOWNFALL OF HALLOWE'EN

Hallowe on one of the few fruly international holi-days, has seen better times. These days, even the kids may not be frightened of goblins and spooks, but in the past 20 centuries the night of October 31—Hallowe'en eve —has been the feared province of welrd happenings, walking dead and deril worship.

For the pagan Druids of the British Isles, who started the whole thing, October 31 was the feast of Samhain, a time to rejoice at bountiful harvests and to predict the cold. Fairies, witches and goblins roamed the countryside to steal infants' destroy crops and livestock.

When Christianity came to Europe, the Church tried to replace the pagan Hailow'en customs. Pope Gragory III instituted All Sainist Day, November 1. In the eighth century. Nearly 300 years later came All Sould Day, November 2. But the ancient habits were hard to root out and Hailowe'en. If anything, developed more elabors are gobtins. Now, saint the folkings, the witches were ate goblins. Now, said the folkfore, the witches were flying about with ominous black cat abourd broomsticks. In England, Scotland, Wales and Ireland, people bobbed for apple, burned nuts to forecast the future if the nuts only smoulder and blacken, look out for trouble! Devil cults added to the mystic aura of Hallowe en by picking October 31 as the date of their most important rituals, or witches 'Sabbaths.

The "trick-or-treat" part of Hallowe'en was created by the Irish and British who apparently felt it was too good a practice to be limited to children. Adults competed

THE 1962 COMMUNITY CHEST

The 1982 Community Chest campaign is now well underway in this and other communities. In Lindsay (the drive doesn't extend to the outlaying communities) several local organization participate in the fund, sharing the proceeds on a pro-rata basis.

the process on a pro rate basis.

Designed originally to overcome multiplicity of appeals for public support by various organizations such as the Salvation Army, Victorian Order of Nurses, etc., the Community Chest shares a common characteristic with all groups which depend on public funds for their existence — It is a bulwark against state control, one of the few such such as the process of the few such as the process of the control of

of the few remaining.

There is a vast difference in the way a state-operated welfare agency raises the money it requires and the way independent organizations go about the same task.

The state reaches into your pocket and takes what it meds—the others, such as those embraced by the Community Chest, ask and leave the amount to you. In addition, the money you give can be designated to your favorite welfare agency, all or in part. If you like the 'free enterprise' way of handling these things, the Community Chest is an important local medium.

The development is of very little comfort to other municipalities that abound with gasoline storage tanks which, all things being equal, could very well cause a similar problem to arise anywhere, anytime.

According to the latest report, it looks as though the hotel may have to close down now that the cold weather season is here because the Ontario Fire Marshal has ruled season is nere because the Unitario Fire marmai has ruled it would be unasie to attempt lighting the furnace which, by the way, also heats adjoining buildings. THE COUNCIL CHAMBERS

AND THE COURT ROOM
Everyone attending council meetings and magistrate's court at Lindsay requires the sharpest of earand the closest proximity to the actual proceedings to
make even a reasonable attempt to keep abreast of what

g place. Monday morning of this week, magistrate's court was held in the council chambers as is customary.

The acoustics are had at any time but if there is any commotion, such as repairs in progress on the building. commotion, such as repairs in progress on the building, court might just as well adjourn. On Monday after-moon, the court moved "up on the build" to the court of the court moved "up on the build" to the court of the court moved "up on the build" to the court of the court frequently during the coller weather and the blessing of the radiators contributes nothing to people's ability to hear and concentrate.

In the case of Lindsay's council chambers, extending the court of the court of the court of the council the c

sive work was carried out on the building but the com-mittee ran out of money, (a fact which is puzzling sev-eral people who felt this work should have been done on an overall contract basis with the whole price determ except for some new chapts which weren't var beauty needed to start with. Let's hope that when the county next carries out some repairs to its court house, consid-eration be given to first things first—the acoustics of the county council chambers and of the court room.

view when hem missed with rights. Tigne call Fullmer's
face as badly that at one point the voteran campaigner
was bleefing from both eyes, the nose, and mouth. A
crowd of about 15-thousand watched as a doctor centered
the ring after the unith round to inspect the cuts. Suit after Fullmer pleaded, the boxt was allowed to go on. One judge called it min-fiveone even ... the other had it seven-five-three even ... and referee Frankic Cart away it 10-one-four even ... thus Fullmer's fifth loss in 62 probuts, including two draws. For Tiger, it was his 57th victory against 12 setbacks and two draws. FIFTH ROUND KNOCKOUT

THE VOTERS' LIST

THE VOTERS' LISI

Hardly an election passes — municipal, provincial or federal — but several people hustle off to vote only to find they are out of luck. It's not that they aren't eligible to vote — their name just isn't on the Voters' List. UNITY OF PURPOSE

Attention is currently focussed on the ecumenical conference in Rome and ps rticular interest is centered around any deliberations which might tend toward closer

relationship between the Roman Cathonic Church and the other religions of the world. At this stage in the conference it is fairly apparent that while actual hope of uniting the world's religions is a long way off, it is generally recognized that unity of purpose is essential to the very survival of religion itself. As one leading churchman has pointed out, the religious forces of the world are now finding themselves in a minimity position. Still another church official predicted a few days ago that unless the religionists aroused them-

turned to spread their materialistic philosophy, this is no time for the God-fearing people of the world to be either divided or passive in their resistance. Lack of unity is it-self interpreted as a sign of weakness by those who have no desire to see the forces for good prevail and the signal for concentrated attack in a divided area.

town's attairs have been handled in 1982?

To be perfectly frank, only two former members of council have shown during the current year that they are still interested in what is taking place. Mr. Harry Peirce and Mrs. Doris Acheson. Even they have given no definite indication of what they plan to do this year. There are murmurs to the effect that two and pos-

There are murmurs to the effect that two and pos-sibly three members of the 1962 council are going to step out this year. Isn't it about time we began thinking about lining up potential replacements? Who will be the first to give the election pot a stir and set it to simmering?

NEW CAR SAFETY HARNESS

In a recent edition of the 'New Ideas' programme broadcast weekly in the BBC General Overseas Service, Allan Murray reported of an improved safety harness for cars recently submitted for the approval of the British Standards Institution.

this Standards Institution.

"Many motionist recognize the great value of a safety belt" said Murray, "but many drivers think that eashing designs are open to two objections. First, there are all the controls when you're strapped in. And secondly the loose websileng frends to make a until yumble.

"These are precisely the snags which the new harness are intended to overcrosm. It was designed by a former statement of the correction. How are designed by a former that it, allows drivers and passengers full freedom of movement with restining its affection; in emergencies. This is because the webbilg is drawn from a rees, attached to the door piller, which takes up all the sizes when smoothly that the normal movements of anybody wearing it are virtually uncertified.

if are virtually unrestricted.

"If the car is suddenly braked or it crashes, the inertia reel, as it's called, at once lock fast, with the harness just where it should be. In Britain, where the hanness is expected to cost something under six pounds, arrangements have already been made to market it. I must say it sounds like a good new idea.

Reports and Remarks...

STILL CANADA'S BICCEST BUSINESS
Arciviliure is still Canada's biggent business despite the trend of recent years to diversified industries. It provides 35 percent of the country's jobs and the agricultural sector of the economy accounts for an estimated 40 percent of the gross national product.

These facts are noted by Canadian Bank of Com-merce in a new booklet, "Careers in Professional Agri-culture", which outlines the "exceptional range" of career opportunities for university graduates in agricul-

For every worker on the farm there are now two workers off the farm engaged in other facets of "agri-business"—the overall term which includes the provis-ions of supplies and services and the processing and

An increase of 70 percent in Canada's consumption of food by 1980 has been predicted, and the growth in world population means that countries like Canada will probably have greater demnads for their food.

"The number of agricultural graduates in Canada will need to be expanded to meet their requirements" says the booklet, which was Deans of Agriculture. "It is estimated that there are potential openings for up to 1,500 agricultural graduates in Canada each year. Yet the supply of new agricultural graduates over the last few years has been averaging less than one-quarter of this figure".

We have often wondered what would happen in Canada if a group, or even an individual, chose to re-ject demands upon him for so-called social security payments and took the position they wanted no part of it—neither contributions nor benefits. Maybe this United States case will indicate the chances (or otherise) of an individual ever again becoming free of state

When we take inventory of what is happening in When we take inventory or what is implement in this country at the moment, it is not difficult to under-stand why so many people are really no longer masters of their own fate and can hardly call their soul their own. The affair in Cuba brings it a little closer to home . . such freedom. How far do you think we would get in any Communist-controlled country peddling our propa-ganda openly and brazenly? We have only to regard the East-West Berlin wall to find the answer to that one.

Someone has to put their foot down on Russian ex-pansion, especially as it presents a military threat to world peace. Russia probably doesn't want to go to war to achieve Communist domination of the world but she apparently has no objection to using intimidation as a weapon for 'peaceful' aggression which she prefers to label 'peaceful' occusione."

FARM UNITY

It was obvious at the Ontario Farmers' Union conven-tion in Lindnsay this week that unity of interests as far as tion in Luddessy this week that unity of interests as fer as the farmet is concerned is going to be a difficient thing to achieve. There are many points of common ground to farmers on which unity can be attained but if we asy farmers on which unity can be attained but if we asy production and maintaining prices at specified production production, particularly those having to do with lucinity production and maintaining prices at specified production levels, that there was a sharp division of feeling. Linday had two conventions or conferences in pro-gress last week — one a th ree-day event (Ontario Farm-ers' Union) and the other running for one day only (Cen-tral Ontario Waterworks). Which is better: the shorter, one-day hard-hitting convention or the longer, three-day affair?

NEW FARM FENCING SYSTEM NEW FARM FENCING SYSTEM

A new fencing system designed by a Yorkshire
working farmer, Charles Mills, is already earning the
approval of farmers in a number of countries outside
Britain for its combined virtues of sturdiness and ease
in setting up either for permanent or temporary fenc-

"The basis of it," reported Bill Myatt in the 'New Ideas' programme broadcast weekly in the BBC General Oversans Service, "is a self-bracing fence-yanth called a Mills fencer, after its originator. This unit can be used either for tencing open wire fences, or as a straining post for single-strand or chain-fink fencing. By ing post for single-strand or chain-link tencing. Hy its use farmers can have strong stock-proof fencing at only part of the cost of other forms. It is said to be just the thing for temporary penning of pigs, for folding sheep, for lambing and shearing pens, and for cattle corrais.

The straining post is made from tubular steel The straining post is made from tubular steel ond, with a welfed square plate which is anchored by four vertical flat plates being driven into the ground this and becking clips, support the wire or chain-link fencing. The boomerang plate faces down the lite opens to provide the necessary grip and stability for the straining post. Straining is done by a pry-bar slopped into holes at the top of the post and used like

conditions ten minutes is about the time it takes to put
up the Mills Fencer. And it is possible for one hundred
yards of pig fencing to be erected in an hour and a half

HUNTING IS NOT DANGEROUS The approach of the hunting sesson will be the signal once again for a number of people to view with alarm and point with horror to the hunting accident toil. They will derry the sport as a dangerous one and cite the current number of hunting accidents to bolster their claim.

Hunting is not a dangerous sport. It is not nearly as dangerous as going for a Sunday drive in the family car. Almost every weekend there are more people killed in automobile accidents across Canada than are killed or automobile accidents across Canasa and are same va-wounded during the entire hunting season. Actually, in-surance companies rank hunting as 17th on the list of dangerous sports with such commonplace activities as football and swimming near the top of the list Hunting is not dangerous. However, some of the people who hunt are dangerous, because they do not obey

the simple rules of courtesy and safety. These same people are equally dangerous when they disregard the simple rules of courtesy and safety at the wheel of their

On the basis of observations made at both, it would appear that the shorter convention had distinct advantages. The business of the occasion was tabled and handled relatively quickly whereas in the longer affair, prolonged discussions taked of to wear; those attending to the point that many district even hother to stay for the finish. This is undestrainable because only a minority of propie engaged in any enterprise can afford to spead a long time away from their business today.

From all available evidence the Conservation Coun-cil is satisfied that the payment of bounties never has and never can effect control of wolves and other predators, and that consequently the bounty system is a complete waste of money.

Furthermore the decision to exterminate wolves in a given area without sufficient knowledge to justify such action can be another way of wasting money that might be channelled into management programmes of known value. Ill considered programmes of wolft control in both Canada and the United States have, in the past, been completely ineffective as far as leading to an increase in deer populations is concerned. It seems to us that the law's effectiveness is hardly likely to be enhanced when these same lunatics, upon conviction, are comforted with soft words of sympathy from the bench. It is just and proper that the motorists who endangers

others by his drunken behaviour should be removed from the road, at least for as long as it takes the lesson to sink into his stily head. As for him being deprived of his live-hold, because the road of his live-hold, as the removed from the road of his live-hold, we are truly sorry. It is an aspect that he might profitably reflected on before he got himself into such
